ABOUT CHOOSE YOUR WAY BELLEVUE

ChooseYourWayBellevue.org is Bellevue's one-stop shop for learning about all of your transportation options. Bellevue's transportation system offers a range of choices that provide people who live and work in the city with viable alternatives to the single-occupant vehicle. Visit ***ChooseYourWayBellevue.org/bike*** for maps, tips, and other resources.

ChooseYourWayBellevue.org includes an online trip logging, rewards and ridematching program. This program is a collaboration between the City of Bellevue, King County Metro and the Bellevue Downtown Association that connects Bellevue workers and residents with fellow commuters, coworkers, friends and neighbors with information and encouragement for using transportation alternatives to driving alone.

Access to Downtown from west. See reverse side
Main Street from 100th to Bellevue Way: Tight but traffic is slow
Wildwood Park
Signed Lake Wa. Loop* route to I-90 trail and Renton

Special notes about bicycling in Downtown Bellevue:

1. In the downtown area, **blue, purple, and red routes** reflect relative motor vehicle volumes, not speeds or the existence of bicycle facilities.
2. When moving at the same speed as motor vehicles, bicyclists should occupy the full lane on roadways, especially in the downtown area.
3. Expect congestion on most downtown streets on weekdays, especially rush hour and lunch time.

*The Lake Washington Loop is a signed bicycle route that circumnavigates Lake Washington. The Bellevue portion extends north/south and runs parallel to the west side of I-405.

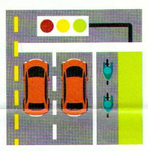
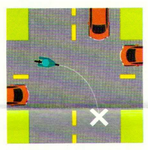
SAFETY TIPS



Obey Traffic Signals & Signs

As a vehicle, bicycles must obey all the rules of the road. Cyclists have the same privileges and responsibilities as other vehicles.

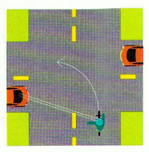


Bike Detector Loops

Trigger the traffic signal by stopping bike over the white "X" or bicycle painted on the roadway.

Passing

Use your voice, "on your left," or bike's bell before passing on left of a pedestrian.

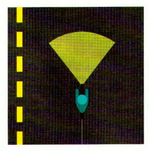


Communicate with other Drivers

Make eye contact and signal your turns and lane changes.

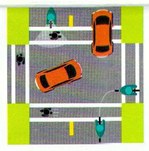
Beware of Car Doors

Ride at least three feet from parked cars and be alert to car doors opening suddenly.



Use a Light at Night

At night, bikes must have white light on front, red reflector on back.



Be Careful at Intersections

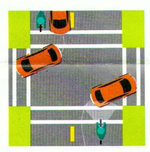
Proceed carefully, make sure you are visible, and signal your intentions. Watch cars at intersections carefully. Make eye contact with drivers. Be visible. Ride further out in the lane as you approach intersections. Be prepared to stop or make an emergency turn if necessary.

Ride to the Right in a Straight Line

Ride as far to the right as practicable, but stay far enough away from the curb to avoid hazards. Ride in a straight line at least three feet away from the curb to allow room for moving around road hazards. Watch for cars entering from driveways.

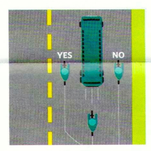
Scan the Road Ahead

At intersections, watch for turning cars and pedestrians. When mid-block, watch for cars pulling out of driveways, alleys and parking spaces. Make eye contact with other drivers. Yield the right-of-way to pedestrians in crosswalks.



Pay Attention to Motorists Making Right-Hand Turns

Be alert for drivers speeding up and then slowing down as they pass you. Do not pass cars on the right near intersections; you will be in the driver's blind spot. Do not rely on other drivers' turn signals.

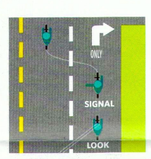


Passing Buses

Pass buses on the left. Bus drivers have blind spots to their right and rear. Passing on the right could get you squeezed against the curb if the bus pulls over. Be prepared to stop for pedestrians who may cross the street in front of the bus.

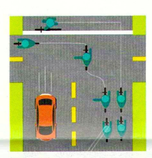
Crossing Railroad Tracks

Cross railroad tracks at a right angle to avoid getting your front wheel caught. Slow down and look behind you for traffic. Change your lane position if necessary to line up to cross the tracks at a right angle. Return to your original lane position after crossing the tracks.



Changing Lanes

To change lanes, look behind you for traffic and signal first. Traffic in the lane you want to move into has the right of way. Look back and wait for an opening in traffic before moving over.



Making Left Turns

There are two ways to make a left turn:

1) Look back for traffic, signal, then make the turn when safe.

2) Ride straight through the intersection, dismount at the opposite corner, and walk your bike across the street in the pedestrian crosswalk.

Always Ride With Traffic

Riding against traffic is unpredictable. Drivers turning at intersections, exiting driveways or leaving parking spaces are not expecting wrong-way bicyclists.

Use Hand Signals

TOOLS & RESOURCES

BikeWise
bikewise.org
A place to learn about and report bike crashes, hazards, and thefts. You can help by reporting issues you see.

MapMyRide
mapmyride.com
Map your bike routes, track your bicycle activity and connect with friends. The Bike Bellevue group hopes that cyclists in Bellevue will identify their preferred bicycle routes so that others interested in cycling in the city will benefit from your knowledge.

Strava
strava.com
Lets you track your rides via your iPhone, Android or dedicated GPS device and helps you analyze and quantify your performance. Provides motivation and camaraderie between riders, as well as information for new riders about where other cyclists currently ride.

Google Maps
google.com/maps
On your desktop you can choose between driving, transit, walking and bicycling when you request directions. It shows you a route, elevation gain and estimated time.

MyBellevue Mobile App
bellevuewa.gov/mybellevue.htm
Allows users to report issues, request services and stay connected to the city using their smart phone or other mobile device. Cyclists can use this app to report bicycle-related maintenance needs. A web-based version is at *assist.bellevuewa.gov*.

Bikeshare
The city supports the entry of private bikeshare in Bellevue. Watch for the potential appearance of bikeshare bikes in Bellevue starting in 2018.

Combining cycling with riding the bus
Sometimes the weather or a flat tire can keep us from biking home once we've already geared up for a ride. Luckily, King County Metro and Sound Transit buses all come equipped with a place for three bikes on the front of the bus. Visit *metro.kingcounty.gov/tops/bike* for more tips on how to combine bicycling and riding the bus.

Park your bike at a park-and-ride
metro.kingcounty.gov/tops/bike/parking/elockers.html

Meet your vanpool by bike
For those in King County Metro vans, Metro provides a free bicycle rack on vanpools at the request of riders in the van. Racks are fitted to the rear of the vehicles and hold up to three bicycles. If you are in a Metro vanpool and would like a rack, contact King County Metro at 206-625-4500 or *vanpool.information@kingcounty.gov*. For more information visit *metro.kingcounty.gov/tops/bike/bikevan.html*.

Secure bicycle parking
Your work building might have secure bike parking. Check with your building manager, or if you work downtown, visit *ChooseYourWayBellevue.org/bike* for access to a downtown map of building bike amenities.

City of Bellevue pedestrian and bicycle planning
Visit the city's Pedestrian and Bicycle Implementation Initiative web page at *bellevuewa.gov/PBII* to see the city's plan and for information about ongoing efforts to make Bellevue a great place to walk and bike.

Levy-funded bicycle projects
The city's Transportation Levy approved by voters in 2016 is helping to fund new and improved bike lanes that are being installed across Bellevue. For more information about recent and upcoming projects, visit *bellevuewa.gov/LevyBike*.

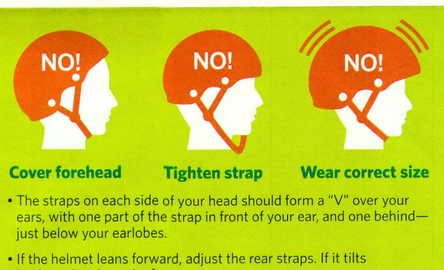
HELMETS: THE RIGHT FIT



Cover forehead **Tighten strap** **Wear correct size**

Helmets are required by law in Bellevue. Your helmet should fit on your head—make sure it is level and is not tilted back or forward. The front of the helmet should sit low—about one or two finger widths above your eyebrows to protect your forehead.

- The straps on each side of your head should form a "V" over your ears, with one part of the strap in front of your ear, and one behind—just below your earlobes.
- If the helmet leans forward, adjust the rear straps. If it tilts backward, tighten the front straps.
- Buckle the chinstrap securely at your throat so that the helmet feels snug on your head and does not move up and down or from side to side.
- Always buy a new helmet. If you are in a crash and your helmet takes a hit, always replace it as it will not offer the same protection.

To load your bike on the front of a Metro or Sound Transit bus:

- Pull handle up, pull rack down.
- Lift bicycle into the rack space farthest from the bus.
- Place latch over tire and check that bike is secure.
- If yours was the only bicycle on the rack, be sure to squeeze the handle and fold the rack back up when you remove your bicycle.

WASHINGTON STATE BIKE LAWS

Summary of Washington State Bicycle Laws

RCW	Code Description
46.04.071	A Bicycle is defined as a human powered device with 2 wheels bigger than 16 inches.
46.61.050	Bicycles must obey traffic lights and stop signs (as well as all other traffic control devices).
46.61.110	Overtaking on the Left ("Safe passing")
46.61.126	Bicycles & Pedestrians must follow traffic laws.
46.61.160	Bicycles cannot ride on some limited access highways.
Bikes forbidden:	SR 520, I-405, I-90 (exit 0 to exit 17), I-5 (Lakewood to Marysville), parts of 18, 518, 522 & 599 and a few others.
46.61.261	A bicycle must yield to a pedestrian on a sidewalk or crosswalk.
46.61.700	Parents are responsible for kids obeying bike laws
46.61.710	Mopeds and gas powered bikes & scooters are not allowed on sidewalks or trails.
46.61.710	Electric-assist bicycles are not allowed on sidewalks. Electric-assist bicycles may be allowed on multipurpose trails, but may be restricted based on local jurisdiction regulation.
46.61.750	Bicyclists riding on roads must obey all traffic laws.
46.61.750	Bicyclists may be ticketed for violating traffic laws
46.61.750	Traffic laws apply on bicycle trails too.
46.61.755	Bicycles have all the same rights and responsibilites as cars.
46.61.755	A bicycle is a vehicle on the road or a pedestrian on the sidewalk.

Adapted from posting at Washington Bikes website. For more information and full text, go to *www.wabikes.org/resources* and click on "Washington State Bicycle Laws."

NOTE: Helmet required by law in Bellevue

RCW	Code Description
46.61.758	Must signal turns with left hand (right=up, left=out, stop=down). But Right hand signal for right turn is an acceptable substitute.
46.61.760	Only one person per bicycle seat.
46.61.765	Clinging to vehicles is illegal.
46.61.770	Can ride 2 abreast, not more
46.61.770	Bicycles may use the shoulder of the roadway or any specially designated bicycle lane if such exists.
46.61.770	Bicycles should ride as near to the right side of the right through lane as is safe except when turning or passing another bicycle or vehicle proceeding in the same direction.
46.61.770	Bicycles can ride on the left side of the left through lane as is safe (with the traffic flow) on one way streets.
46.61.775	Must have at least one hand on the handlebars at all times.
46.61.775	Cannot ride carrying anything with both hands while riding.
46.61.780	Bikes must have brakes.
46.61.780	At night, bikes must have white light on front, red reflector on the back.
46.61.780	Steady or flashing red rear light may be used in addition to the reflector.
46.61.790	Police may impound bicycle if you are too impaired.
47.36.025	New and updated traffic signals must detect bicycles.

As a bicyclist, you are responsible for understanding and following the current laws and rules of the road. This may not be a comprehensive or up to date summary of the laws that apply to bicyclists.
